Esmuflily - SMuFL / Ekmelos for LilyPond

Esmuflily is an extension for LilyPond that supports SMuFL compliant fonts, in particular, to facilitate the use of glyphs from Ekmelos : clefs, time signatures, note heads, articulations, etc.
Esmuflily provides switches to turn the SMuFL support on or off for individual types of graphical objects (clefs, note heads, etc.) and it defines additional commands and styles for SMuFL glyphs which are not available in LilyPond (note head styles, function theory symbols, etc.) So scores can benefit from both SMuFL's comprehensive character set and LilyPond's awesome Emmentaler font.
This documentation uses the Ekmelos font for all SMuFL glyph.

Esmuflily requires LilyPond version 2.24.0 or higher.

See Ekmelily for accidentals and key signatures.

Author and License

Esmuflily was written by Thomas Richter, thomas-richter@aon.at

Download, Installation, Usage

Download

The folder `ly` contains the include files.
Copy the file `esmufl.ily` into an appropriate folder.

Optionally install a SMuFL compliant font .

Add the following lines near the top of your LilyPond input file.

```
ekmFont = FONTNAME
\include "esmufl.ily"
```

Esmuflily + Ekmelily

To combine Esmuflily with Ekmelily add e.g. the following lines near the top of your LilyPond input file.

```
ekmFont = FONTNAME
ekmSystem = TUNING
\include "cosmufl.ily"
\language "LANGUAGE"
\ekmelicStyle STYLENAME
```

The default FONTNAME is Ekmelos , TUNING is 24 (includes `ekmel-24.ily`), LANGUAGE is `nederlands` (in most tunings), and STYLENAME is `stc` (Stein/Couper accidentals, in tuning 24).
This corresponds with LilyPond's standard setting.

Fonts

Esmuflily requires a SMuFL compliant font.
It uses Ekmelos by default. Another font can be selected, either with the variable

```
ekmFont = FONTNAME
```

(or `ekmelicFont` as in previous versions) preceding the include file,
or with the command line option

```
-dekmfont=FONTNAME
```

(or `ekmelic-font` as in previous versions). Note that this option produces a warning 'no such internal option', which can be ignored. Warnings can be suppressed with the command line option `--loglevel=ERROR` or `--loglevel=NONE` .

Drawing paths

Esmuflily supports drawing paths instead of font glyphs, which allows e.g. to produce stand-alone SVG output. This requires the Scheme procedure `ekm-path-stencil` as it is provided for Ekmelos by the include file `ly/ekmelos-paths.ily`.

A trailing `#` in FONTNAME switches to globally drawing paths, i.e. it effects all SMuFL output except for the markup commands `\ekm-charf` and `\ekm-str`.

Note that spaces and other glyphs without a contour, as well as side-bearing and font features like stylistic alternates or ligatures are not available with paths. See the second output below:

```
\ekm-chars #'(#xE262 #xE566 #xEAA6 #xEAA5)
```

To draw Ekmelos glyphs as paths, add the following lines near the top of your LilyPond input file. A single `"#"` is equivalent to `"Ekmelos#"` .

```
ekmFont = "#"
\include "ekmelos-paths.ily"
\include "esmufl.ily"
```

Commands

Most of the commands, in particular, all markup commands always produce SMuFL output, independent of any switches . Other commands behave differently when the corresponding switch is turned off:

[Ly] Produces normal LilyPond output.

[Err] Causes an error or produces useless output.

Some commands with a corresponding LilyPond command are simpler implemented, e.g. they ignore properties, while a few provide additional features.
Some styles and commands make use of Ekmelos specific supplements, starting at code point U+F600, or assume the Ekmelos font metrics. Ancient symbols and styles are not supported. Most of the ancient glyphs are not implemented in Ekmelos .

Some commands and properties accept one of the following special values:

- EXTEXT : A code point, a list of code points, or markup.
- DEFINITION : A string of keys.
- ORIENTATION : Sum of axis and direction.

SMuFL glyphs are always accessed by code point (EXTEXT). See the file `ly/ekmelos-map.ily` at Ekmelos with definitions to access glyphs by name.

All commands have the prefix `ekm` or `ekm-` .

SMuFL switches

```
\ekmSmuflOn #'TYPE
\ekmSmuflOn #'(TYPE ...)
\ekmSmuflOff #'TYPE
\ekmSmuflOff #'(TYPE ...)
```

Turn the SMuFL support on and off, respectively, for one or more types of graphical objects. TYPE is one of the following symbols. Any other value is ignored.

These commands set/undo context and grob properties (usually the stencil) in the current bottom context, except for `colon` and `segno` which are set independently of a context and cannot be turned off.

`all`	All following types
`clef`	Clefs and clef modifiers
`time`	Time signatures
`notehead`	Note heads
`dot`	Augmentation dots
`flag`	Flags and grace note slashes
`rest`	Rests and multi-measure rests
`systemstart`	System start delimiters
`dynamic`	Absolute dynamic marks
`script`	Scripts
`textspan`	Text span
`trill`	Trill span and trill pitch
`lv`	Laissez vibrer
`colon`	Colon bar lines
`segno`	Segno bar lines
`percent`	Percent repeats
`tremolo`	Tremolos
`arpeggio`	Arpeggios
`tuplet`	Tuplet numbers
`fingering`	Fingering instructions
`stringnumber`	String number indications
`pedal`	Piano pedals
`fbass`	Figured bass
`lyric`	Lyric text

This demonstrates possible places for SMuFL switches : a `\with` block, a `\layout` block, and in the music stream. Note that `\ekmTremolo` has no effect after the `tremolo` switch is turned off.

```
\score {
  \new Staff \with {
    \ekmSmuflOn #'trill
  }
  \relative c'' {
    \ekmSmuflOn #'notehead
    \override NoteHead.style = #'triangle

Change clefs use special glyphs, except for `frenchG`, `bridge`, `string`, `behindbridgestring`, `accordion`, `indiandrum`, and the 4-string tab clefs, which are drawn with the normal glyph but smaller. The relative font size for change clefs can be set with the variable `ekm:clef-change-font-size` as a pair `(SPECIAL-GLYPH-SIZE . NORMAL-GLYPH-SIZE)`. The standard value is `'(1.5 . -2)`.

Time signatures

`\ekmSmuflOn #'time`

Draw SMuFL time signatures.

`\ekmCompoundMeter TIME-SIGNATURE`

Set the numeric time signature.

`\ekm-compound-meter TIME-SIGNATURE`

Draw the numeric time signature as markup.

Compound meters use the large plus sign between fractions and the small plus sign between the numbers in a numerator. Some rational numbers can be part of a numerator. If specified in a pair, e.g. `(1 . 1/2)` , this is treated as a single number without a plus sign in between.

`4/4`	𝐂	U+E08A	timeSigCommon

`1/2`	½	U+E098	timeSigFractionHalf
`3/4`	¾	U+E099	timeSigFractionThreeQuarters
`1/3`	⅓	U+E09A	timeSigFractionOneThird
`2/3`	⅔	U+E09B	timeSigFractionTwoThirds

```
\relative c'' {
  \ekmCompoundMeter #'(5 8)
  c8 c c c c
  \ekmCompoundMeter #'((2 8) (3 8))
  c8 c c c c
  \ekmCompoundMeter #'(2 3 8)
  c8 c c c c
  \break

  \ekmCompoundMeter #'(1 1/4 2)
  c8 c c c c
  \ekmCompoundMeter #'(((1 . 1/4) 2))
  c8 c c c c
  \break

  \ekmCompoundMeter #'((2 4) (1 4) (1 8))
  c8 c c c c c c
  \ekmCompoundMeter #'((2 4) (2 1 8))
  c8 c c c c c c
  \ekmCompoundMeter #'((2 4) (1 1/2 4))
  c8 c c c c c c
  \break

  \ekmCompoundMeter #'((2 4) (3 8))
  c8 c c c c c c
  \ekmCompoundMeter #'((2 4) ((1 . 1/2) 4))
  c8 c c c c c c
  \ekmCompoundMeter #'(2 (1 . 1/2) 4)
  c8 c c c c c c
}
```

Cadenza signatures

`\ekmCadenzaOn STYLE`

Start a cadenza like `\cadenzaOn` and set a signature. STYLE can be one of the following symbols.

`time-x`	U+E09C	timeSigX
`time-penderecki`	U+E09D	timeSigOpenPenderecki

Staff dividers and separators

`\ekmStaffDivider DIRECTION`

Draw the next barline with an indicator to split or recombine the staff and set a `\break` . The direction specifies the type of indicator (arrow).

`#DOWN`	U+E00B	staffDivideArrowDown
`#UP`	U+E00C	staffDivideArrowUp
`#CENTER`	U+E00D	staffDivideArrowUpDown

`system-separator-markup = \ekmSlashSeparator SIZE`

Draw a system separator mark of the specified size (set within a `\paper` block).
SIZE is an integer in the range 0 to 2.

`#0`	U+E007	systemDivider
`#1`	U+E008	systemDividerLong
`#2`	U+E009	systemDividerExtraLong

```
\new Staff
<<
  \new Voice {
    \relative c'' {
      \voiceOne
      g a b c
      \bar "||" \ekmStaffDivider #CENTER
    }
  }
  \new Voice {
    \relative c' {
      \voiceTwo
      e c f e
    }
  }
>>
```

Note heads

`\ekmSmuflOn #'notehead`

Draw SMuFL note heads. The style can be one of the following symbols. The `harmonic` and `cross` glyphs are also used with commands like `\harmonic` and `\xNote` .

`default`

U+F637 noteheadLongaUp

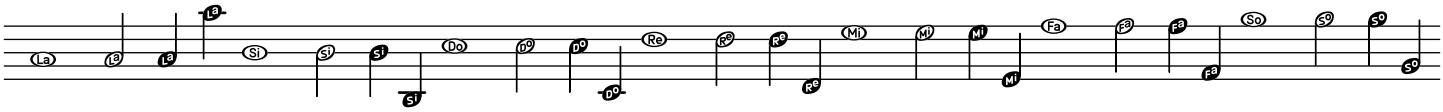
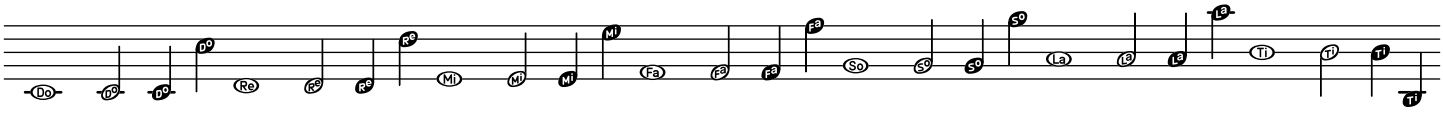
`\ekmNameHeadsMinor`

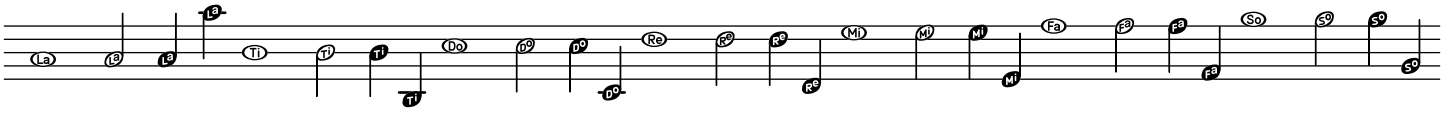


`\ekmNameHeadsTi`

`do ... la`	:	
`ti`	U+E156	noteTiWhole
	U+E15E	noteTiHalf
	U+E166	noteTiBlack



`\ekmNameHeadsTiMinor`



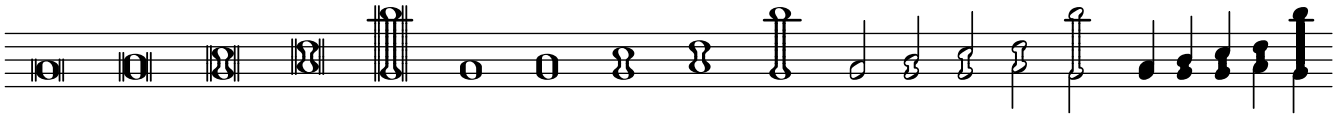
Note clusters

`\ekmMakeClusters MUSIC`

Draw clusters instead of chords in MUSIC, consisting of a bottom and a top note head, and ignoring inner notes of the chords ('Cowell clusters'). The note head style can be one of the following symbols.

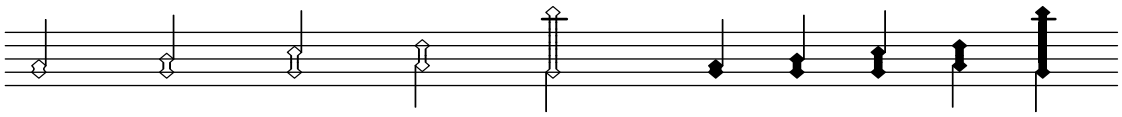
`default`

U+E124	noteheadClusterDoubleWhole2nd
U+E128	noteheadClusterDoubleWhole3rd
U+E12C	noteheadClusterDoubleWholeTop
U+E12D	noteheadClusterDoubleWholeMiddle
U+E12E	noteheadClusterDoubleWholeBottom
U+E125	noteheadClusterWhole2nd
U+E129	noteheadClusterWhole3rd
U+E12F	noteheadClusterWholeTop
U+E130	noteheadClusterWholeMiddle
U+E131	noteheadClusterWholeBottom
U+E126	noteheadClusterHalf2nd
U+E12A	noteheadClusterHalf3rd
U+E132	noteheadClusterHalfTop
U+E133	noteheadClusterHalfMiddle
U+E134	noteheadClusterHalfBottom
U+E127	noteheadClusterQuarter2nd
U+E12B	noteheadClusterQuarter3rd
U+E135	noteheadClusterQuarterTop
U+E136	noteheadClusterQuarterMiddle
U+E137	noteheadClusterQuarterBottom



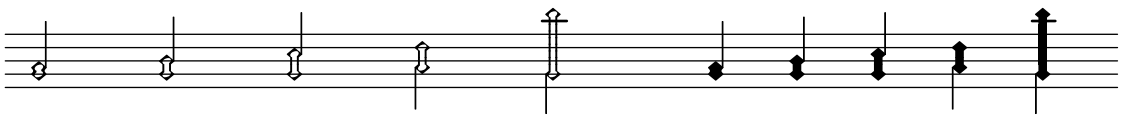
`harmonic`

U+E138	noteheadDiamondClusterWhite2nd
U+E13A	noteheadDiamondClusterWhite3rd
U+E13C	noteheadDiamondClusterWhiteTop
U+E13D	noteheadDiamondClusterWhiteMiddle
U+E13E	noteheadDiamondClusterWhiteBottom
U+E139	noteheadDiamondClusterBlack2nd
U+E13B	noteheadDiamondClusterBlack3rd
U+E13F	noteheadDiamondClusterBlackTop
U+E140	noteheadDiamondClusterBlackMiddle
U+E141	noteheadDiamondClusterBlackBottom



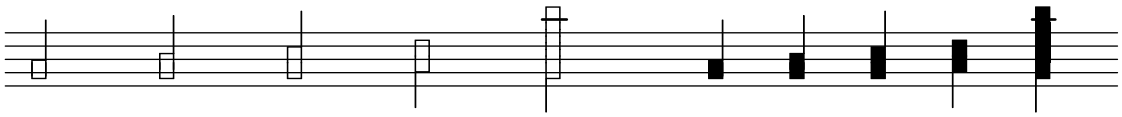
`diamond`

U+F64B	noteheadDiamondClusterHalf2nd
U+F64C	noteheadDiamondClusterHalf3rd
U+F64D	noteheadDiamondClusterHalfTop
U+F64E	noteheadDiamondClusterHalfMiddle
U+F64F	noteheadDiamondClusterHalfBottom
U+E139	noteheadDiamondClusterBlack2nd
U+E13B	noteheadDiamondClusterBlack3rd
U+E13F	noteheadDiamondClusterBlackTop
U+E140	noteheadDiamondClusterBlackMiddle
U+E141	noteheadDiamondClusterBlackBottom



`square`

U+E145	noteheadRectangularClusterWhiteTop
U+E146	noteheadRectangularClusterWhiteMiddle
U+E147	noteheadRectangularClusterWhiteBottom
U+E142	noteheadRectangularClusterBlackTop
U+E143	noteheadRectangularClusterBlackMiddle
U+E144	noteheadRectangularClusterBlackBottom



Note:
For intervals larger than a third (except for `square`) the drawn cluster is a stack of one bottom segment, M middle segments, and one top segment. Mid and Top are the staff positions of the middle and top segments relative to the bottom segment.

Interval	M	Mid	Top
4th	0	-	3
5th	1	2	4
6th	2	2 3	5
7th	3	2 3 4	6
octave	4	2 3 4 5	7

...

The segment glyphs in Ekmelos are designed for these values.

However, in the implementation notes of SMuFL Note clusters, the octave cluster is said to have 3 middle segments, while the 6th cluster has 2 middle segments. The “appropriate number of middle segments” varies apparently depending on the font.

Note head markup

`\ekm-note-by-number STYLE LOG DOTS DIRECTION`

Draw a note with augmentation dots as markup. It does not support stem lengths. STYLE can be one of the following symbols or one of the note head style symbols . LOG can be in the range -2 (or -1) to 10. Some styles have notes only for LOG ≤ 5 (32nd note) with stem up.

`note`

U+F637	noteheadLongaUp
U+F638	noteheadLongaDown
U+E1D0	noteDoubleWhole
U+E1D2	noteWhole
U+E1D3	noteHalfUp
U+E1D4	noteHalfDown
:	
U+E1E6	note1024thDown

`short`

U+F637	noteheadLongaUp
U+E1D0	noteDoubleWhole
U+E1D2	noteWhole
U+E1D3	noteHalfUp
U+E1D5	noteQuarterUp
U+F684	note8thUpShort
U+F687	note16thUpShort
U+F68A	note32ndUpShort

`beamed`

U+F637	noteheadLongaUp
U+E1D0	noteDoubleWhole
U+E1D2	noteWhole
U+E1D3	noteHalfUp
U+E1D5	noteQuarterUp
U+F685	note8thUpBeamed
U+F688	note16thUpBeamed
U+F68B	note32ndUpBeamed

Augmentation dots

`\ekmSmuflOn #'dot`

Draw SMuFL augmentation dots.

Flags and grace note slashes

`\ekmSmuflOn #'flag`

Draw SMuFL flags and grace note slashes.

`\ekmFlag STYLE`

Set the specified flag style. It actually overrides the properties `Flag.style` and `Stem.details.lengths`. STYLE can be one of the following symbols. Note that the glyphs for `short` stem down flags are Ekmelos specific. [Err]

`default`

U+E240	flag8thUp
U+E241	flag8thDown
U+E242	flag16thUp
U+E243	flag16thDown
U+E244	flag32ndUp
U+E245	flag32ndDown
U+E246	flag64thUp
U+E247	flag64thDown
U+E248	flag128thUp
U+E249	flag128thDown
U+E24A	flag256thUp
U+E24B	flag256thDown
U+E24C	flag512thUp
U+E24D	flag512thDown
U+E24E	flag1024thUp
U+E24F	flag1024thDown

`straight`

U+F40F	flag8thUpStraight
U+F411	flag8thDownStraight
U+F412	flag16thUpStraight
U+F414	flag16thDownStraight
U+F415	flag32ndUpStraight
U+F417	flag32ndDownStraight
U+F418	flag64thUpStraight
U+F41A	flag64thDownStraight
U+F41B	flag128thUpStraight
U+F41D	flag128thDownStraight
U+F41E	flag256thUpStraight
U+F420	flag256thDownStraight
U+F421	flag512thUpStraight
U+F423	flag512thDownStraight
U+F424	flag1024thUpStraight
U+F426	flag1024thDownStraight

`short`

U+F410	flag8thUpShort
U+F6C0	flag8thDownShort
U+F413	flag16thUpShort
U+F6C1	flag16thDownShort
U+F416	flag32ndUpShort
U+F6C2	flag32ndDownShort
U+F419	flag64thUpShort
U+F6C3	flag64thDownShort
U+F41C	flag128thUpShort

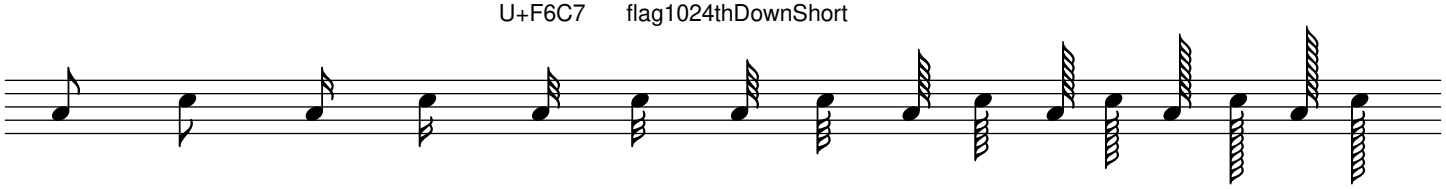
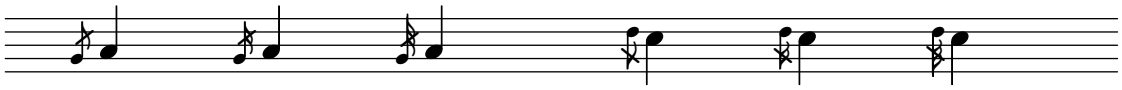
U+F6C6	flag512thDownShort
U+F425	flag1024thUpShort
U+F6C7	flag1024thDownShort



Grace note slash

`\slashedGrace`

U+E564	graceNoteSlashStemUp
U+E565	graceNoteSlashStemDown



Rests

`\ekmSmuflOn #'rest`

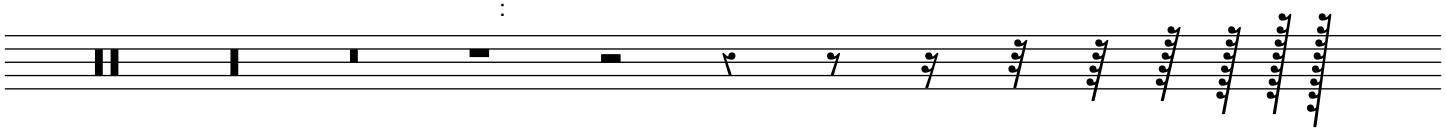
Draw SMuFL rests and multi-measure rests, as well as SMuFL time signature digits for multi-measure rest numbers. The style can be one of the following symbols.

`default`

U+E4E0 restMaxima
U+E4E1 restLonga
U+E4E2 restDoubleWhole
U+E4E3 restWhole
U+E4E4 restHalf
U+E4E5 restQuarter
U+E4E6 rest8th
U+E4E7 rest16th
U+E4E8 rest32nd
U+E4E9 rest64th
U+E4EA rest128th
U+E4EB rest256th
U+E4EC rest512th
U+E4ED rest1024th

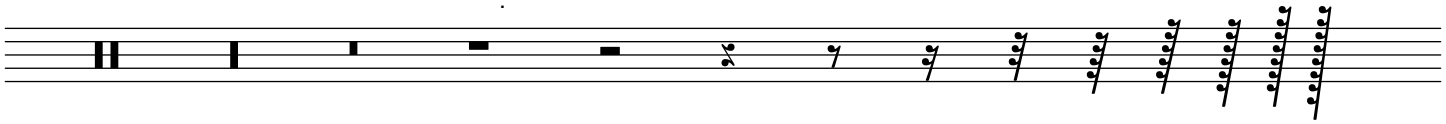
`classical`

:
U+E4F2 restQuarterOld
:



`z`

:
U+E4F6 restQuarterZ
:



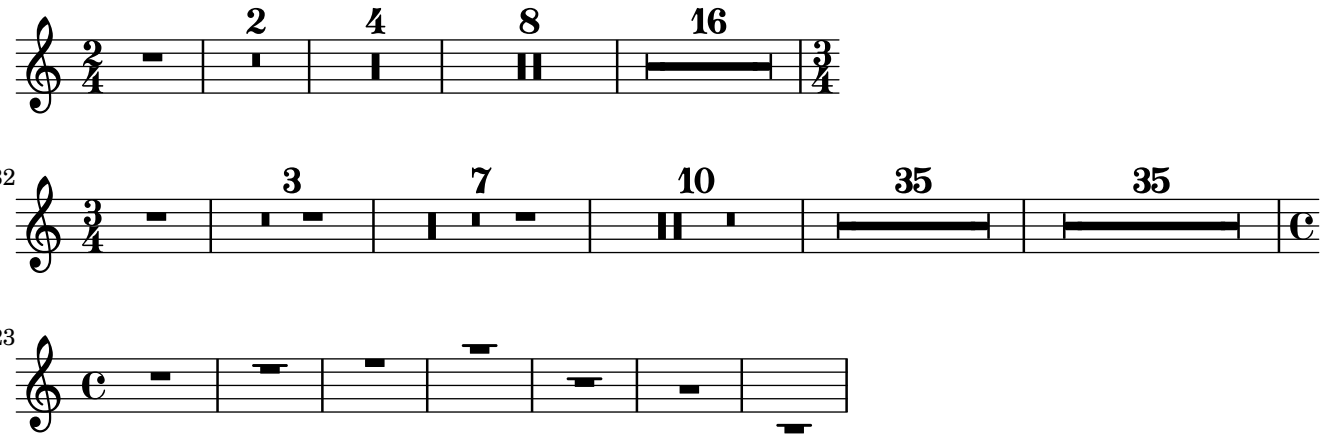
In the following example, the time signatures are LilyPond's Emmentaler glyphs while the multi-measure rest numbers are SMuFL (Ekmelos) glyphs.

```
\relative c'' {
  \ekmSmuflOn #'rest

  \compressMMRests {
    \time 2/4
    R2 R1 R\breve R\longa R\maxima
    \break

    \time 3/4
    R2. R2.*3 R2.*7 R2.*10
    R2.*35
    \override MultiMeasureRest.space-increment = 2.5
    R2.*35
    \break
  }

  \time 4/4
  R1
  \override MultiMeasureRest.staff-position = #1
  R1
  \override MultiMeasureRest.staff-position = #2
  R1
  \override MultiMeasureRest.staff-position = #4
  R1
  \override MultiMeasureRest.staff-position = #-1
  R1
  \override MultiMeasureRest.staff-position = #-2
  R1
  \override MultiMeasureRest.staff-position = #-8
  R1
}
```



`\ekm-rest-by-number LOG DOTS`

Draw a rest with augmentation dots as markup. LOG can be in the range -3 to 10. The dots are vertically centered, contrary to `\rest-by-number` .

Used properties:

- `font-size` (0)
- `ledgers` ('(-1 0 1))
- `style` ('())

`\ekm-multi-measure-rest-by-number MEASURES`

Draw a multi-measure rest as markup, with the number placed centered above unless it is 1.

Used properties:

- `font-size` (0)
- `expand-limit` (10)
- `style` ('())
- `word-space`
- `width` (8)
- `multi-measure-rest-number` (#t)

`\ekm-rest DURATION`

Draw either a rest or a multi-measure rest as markup.

```
\ekm-rest-by-number #-1 #1
\ekm-rest-by-number #2 #2
\ekm-rest-by-number #3 #1

\ekm-multi-measure-rest-by-number #7
\ekm-multi-measure-rest-by-number #16

\ekm-rest { \breve. }
\ekm-rest { 4.. }
\ekm-rest { 8. }

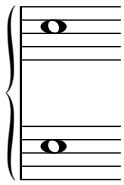
\override #'(multi-measure-rest . #t)
\override #'(multi-measure-rest-number . #f)
\ekm-rest { 1*7 }

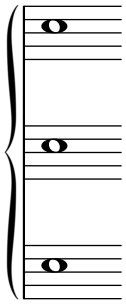
\override #'(multi-measure-rest . #t)
\ekm-rest { 1*16 }
```

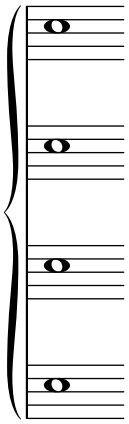
System start delimiters

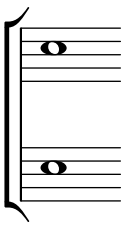
`\ekmSmuflOn #'systemstart`

Draw SMuFL system start delimiters, braces and brackets, using `\ekm-system-start` .









`\ekm-system-start STYLE SIZE`

Draw a system start delimiter as markup with the size (height) in staff units. STYLE can be one of the following symbols. For brace, it makes use of Bravura's stylistic alternates or Ekmelos' size variants, each intended for a specific range of sizes.

Used property:

- `font-size` (0)

`brace`		U+E000	brace
`bracket`		U+E003	bracketTop
		U+E004	bracketBottom

Dynamics

`\ekmSmuflOn #'dynamic`

Draw SMuFL absolute dynamic marks.

`\p`	U+E520	dynamicPiano
`\pp`	U+E52B	dynamicPP
`\ppp`	U+E52A	dynamicPPP
`\pppp`	U+E529	dynamicPPPP
`\ppppp`	U+E528	dynamicPPPPP
`\mp`	U+E52C	dynamicMP

`\f`	U+E522	dynamicForte
`\ff`	U+E52F	dynamicFF
`\fff`	U+E530	dynamicFFF
`\ffff`	U+E531	dynamicFFFF
`\fffff`	U+E532	dynamicFFFFF
`\mf`	U+E52D	dynamicMF

`\fp`	U+E534	dynamicFortePiano
`\sf`	U+E536	dynamicSforzando1
`\sff`	U+F645	dynamicSforzandoFF
`\sfp`	U+E537	dynamicSforzandoPiano
`\sfz`	U+E539	dynamicSforzato
`\rfz`	U+E53D	dynamicRinforzando2
`\sp`	U+F646	dynamicSP
`\spp`	U+F647	dynamicSPP
`\n`	U+E526	dynamicNiente

`\ekm-dynamic DEFINITION`

Draw a dynamic symbol as markup. DEFINITION may consist of the letters f, m, n, p, r, s, and z. The symbol is either one precomposed glyph or a sequence of glyphs for each letter.

Note that this is slightly different from the usual interpretation of DEFINITION , e.g. `"sfmp"` is drawn with four glyphs and not with two glyphs for the keys `"sf"` and `"mp"` , cf.:

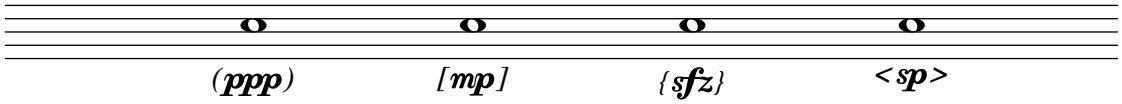
```
\ekm-dynamic "sfmp"
```
sfmp

```
\concat { \ekm-dynamic "sf" \ekm-dynamic "mp" }
```
sfmp

`\ekmParensDyn STYLE DYNAMIC-MARK`

Draw the absolute dynamic mark parenthesized. STYLE can be one of the following symbols.

`default`	U+0028	parenleft
	U+0029	parenright
`bracket`	U+005B	bracketleft
	U+005D	bracketright
`brace`	U+007B	braceleft
	U+007D	braceright
`angle`	U+003C	less
	U+003E	greater



`\ekmParensHairpin STYLE`

Draw the subsequent hairpin parenthesized. STYLE can be one of the following symbols.

`default`	U+E542	dynamicHairpinParenthesisLeft
	U+E543	dynamicHairpinParenthesisRight
`bracket`	U+E544	dynamicHairpinBracketLeft
	U+E545	dynamicHairpinBracketRight
`brace`	U+007B	braceleft
	U+007D	braceright
`angle`	U+EA93	functionAngleLeft
	U+EA94	functionAngleRight

Scripts - Expressive marks

```
\ekmSmuflOn #'script
```

Draw SMuFL scripts for expressive marks like articulations, ornamentations, performance indications, fermatas, repeat signs, etc.

```
\ekmScript #'NAME #'(EXTEXT-UP . EXTEXT-DOWN)
\ekmScript #'NAME EXTEXT
```

Create a script from EXTEXT , either a pair for up and down or a single value for both directions. If the latter is a list it must be enclosed in a list. [Ly]
NAME is the symbol of an existing script like `accent` `marcato` `trill` `turn` `upbow` `open` `lheel` `segno` etc. It determines the vertical positioning of the script.

```
\ekmScriptSmall #'NAME #'(EXTEXT-UP . EXTEXT-DOWN)
\ekmScriptSmall #'NAME EXTEXT
```

Create a script with a 3 steps smaller font size. [Ly]

Articulations

```
\accent                         U+E4A0    articAccentAbove
                                U+E4A1    articAccentBelow
```

```
\ekmScript #'accent #'((#xE4A0 1) . (#xE4A1 1))
                                U+F42A    articAccentAboveLarge

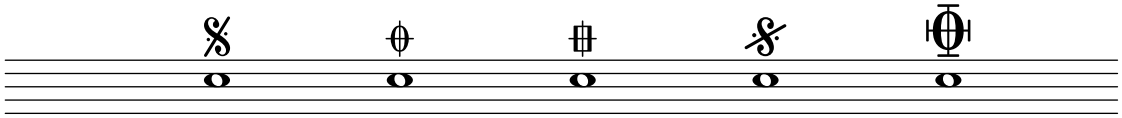
`\ekmScript #'coda #'((#xE048 1))`	U+F405	codaJapanese



`\ekmSmuflOn #'textspan`

Draw text spans assembled from SMuFL multi-segment glyphs.

`\ekmSmuflOn #'trill`

Draw trill spans assembled from SMuFL multi-segment glyphs, and SMuFL trill pitches.
See also Trill spans and pitches.

`\ekmStartSpan STYLE TEMPO ATTACHMENT`

Start a text span or trill span. [Ly]
STYLE can be one of the symbols further below. `'trill` starts a trill span. A second style can be added to draw other glyphs, e.g. `'trill-vibrato-large` . Any other style starts a text span, in particular, a style not specified below like `'dashed-line` produces normal LilyPond output.
TEMPO is a number or a pair of numbers (rounded to integer) for the segments of the spanner. 0 is the main (medium) segment. Positive values mean faster (narrower) segments. Negative values mean slower (wider) segments. A pair `'(A . B)` draws all segments from A through B, evenly distributed over the spanner. The available range of numbers depends on the style.
ATTACHMENT is an EXTEXT or a pair `'(EXTEXT-LEFT . EXTEXT-RIGHT)` for the edge symbols. A single EXTEXT is equivalent to `'(EXTEXT . 0)`. It must be specified in a pair if it is a list.
`#f` draws the standard glyphs left and right according to the style.

`\ekmStartSpanMusic STYLE TEMPO ATTACHMENT MUSIC`

Start a text span or trill span at MUSIC. [Ly]
This is a music function that doesn't need the `textspan` or `trill` SMuFL switch turned on.

Trill spans and pitches

`\ekmSmuflOn #'trill`

Draw trill spans assembled from SMuFL multi-segment glyphs, and SMuFL trill pitches.

`\ekmStartTrillSpan TEMPO`

Start a trill span with the style `'trill` . See Multi-segment spanner . [Ly]
TEMPO is a number or a pair of numbers (rounded to integer) in the range 4 to -4.

`\startTrillSpan` is equivalent to `\ekmStartTrillSpan #0`
and to `\ekmStartSpan #'trill #0 ##f`

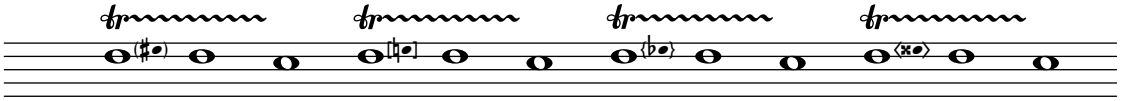
`\ekmStartTrillSpanScript` is deprecated. Use the more general `\ekmStartSpan` instead.

`\ekmPitchedTrill NOTEHEAD-STYLE PARENS-STYLE MAIN-NOTE AUXILIARY-NOTE`

Draw a trill pitch. For NOTEHEAD-STYLE see Noteheads . PARENS-STYLE can be one of the following symbols. Variable accidentals for auxiliary notes are supported by Ekmelily . [Err]

`\pitchedTrill` is equivalent to `\ekmPitchedTrill #'default #'default`

`default`	U+E26A	accidentalParensLeft
	U+E26B	accidentalParensRight
`bracket`	U+E26C	accidentalBracketLeft
	U+E26D	accidentalBracketRight
`brace`	U+F6D4	accidentalBraceLeft
	U+F6D5	accidentalBraceRight
`angle`	U+F6D6	accidentalAngleLeft
	U+F6D7	accidentalAngleRight



```

Laissez vibrer

`\ekmSmuflOn #'lv`

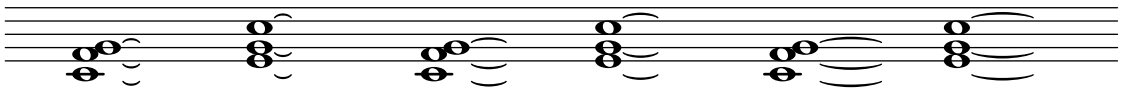
Draw SMuFL laissez vibrer ties.

`\ekmLaissezVibrer SIZE`

Draw a laissez vibrer tie after a note. SIZE is an integer in the range 0 to 2. [Ly]

`\laissezVibrer` is equivalent to `\ekmLaissezVibrer #0`

`#0`	U+E4BA	articLaissezVibrerAbove
	U+E4BB	articLaissezVibrerBelow
`#1`	U+F6FC	articLaissezVibrerAboveLong
	U+F6FD	articLaissezVibrerBelowLong
`#2`	U+F6FE	articLaissezVibrerAboveExtraLong
	U+F6FF	articLaissezVibrerBelowExtraLong



Breathing signs and caesuras

`\ekmBreathing EXTEXT`

Draw a breathing sign or caesura from EXTEXT .

`##xE4CE`	U+E4CE	breathMarkComma
`##xE4CF`	U+E4CF	breathMarkTick
`##xE4D1`	U+E4D1	caesura
`#'(#xE4D1 1)`	U+F42C	caesuraSlashSingleStroke

Colon and Segno bar lines

`\ekmSmuflOn #'colon`

Draw SMuFL colon (repeat) bar lines.

`\ekmSmuflOn #'segno`

Draw SMuFL segno bar lines. It defines two additional bar glyphs: `s` and `$` .

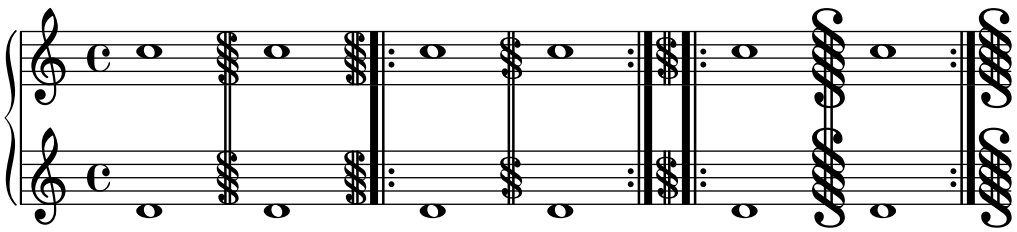
Note that both, `colon` and `segno` are set independently of a context and cannot be turned off.

:	U+E043	repeatDots
S	U+E04A	segnoSerpent1
s	U+F6C8	segnoSerpentSmall1
$	U+F6CA	segnoSerpentLarge1

```
\new PianoStaff \with {
  \ekmSmuflOn #'segno
}
<<
  \new Staff \relative c'' {
    c1 \bar "S"
    c \bar "S.|:-S"

    c \bar "s"
    c \bar ":|.s.|:-s"

    c \bar "$"
    c \bar ":|.$-$"
  }
  \new Staff \relative c' {
    d1 d d d d d
  }
>>
```



Percent repeats

`\ekmSmuflOn #'percent`

Draw SMuFL percent repeats.

U+E504	repeatBarSlash
U+E500	repeat1Bar
U+E501	repeat2Bars

```
\relative c'' {
  \ekmSmuflOn #'percent

  \repeat percent 4 { c4 }
  \repeat percent 4 { c8 d }
  \repeat percent 4 { c16 d e f }
  \repeat percent 4 { c32 d e f c d e f }
  \break

  \repeat percent 2 { c4 d e d }
  \repeat percent 2 { c2 e }
  \break

  \repeat percent 2 { g,16 b c8~ c4 }
  \repeat percent 2 { c4 d e d | c2 e }
}
```

Tremolo marks

`\ekmSmuflOn #'tremolo`

Draw SMuFL tremolo marks on stems. The style (shape) can be one of the following symbols. Note: The symbol `ekm` is used internally by `\ekmTremolo` (see below).

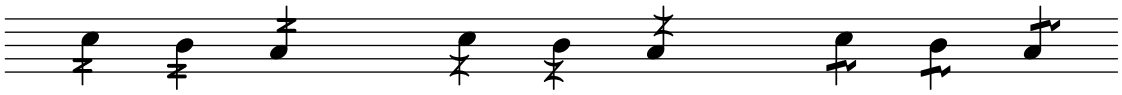
`beam-like`	:8	U+E220	tremolo1
	:16	U+E221	tremolo2
	:32	U+E222	tremolo3
	:64	U+E223	tremolo4
	:128	U+E224	tremolo5

`fingered`	:8	U+E225	tremoloFingered1
	:16	U+E226	tremoloFingered2
	:32	U+E227	tremoloFingered3
	:64	U+E228	tremoloFingered4
	:128	U+E229	tremoloFingered5

`\ekmTremolo EXTEXT MUSIC`

Draw a tremolo mark from EXTEXT on the stems of the tremolo notes in MUSIC, independent of the subdivision `:N` . The following names (strings) draw predefined symbols. A list of code points or a markup is centered horizontally, while a single code point is assumed being a centered stem decoration. [Ly]

`buzzroll`	U+E22A	buzzRoll
`penderecki`	U+E22B	pendereckiTremolo
`stockhausen`	U+E232	stockhausenTremolo



`unmeasured`	U+E22C	unmeasuredTremolo
`unmeasuredS`	U+E22D	unmeasuredTremoloSimple

Tuplet numbers

`\ekmSmuflOn #'tuplet`

Draw SMuFL tuplet numbers as numerator only. Set the first formatting function listed below, so this switch is not required if one of these functions is set explicitly.

0	𝅘𝅥𝅯	U+E880	tuplet0
	:		
9	𝅘𝅥𝅯	U+E889	tuplet9
:	:	U+E88A	tupletColon

```
ekm-tuplet-number::calc-denominator-text
ekm-tuplet-number::calc-fraction-text
(ekm-tuplet-number::non-default-tuplet-denominator-text NUM)
(ekm-tuplet-number::non-default-tuplet-fraction-text NUM DENOM)
(ekm-tuplet-number::append-note-wrapper
  FUNCTION DURATION)
(ekm-tuplet-number::fraction-with-notes
  NUM-DURATION DENOM-DURATION)
(ekm-tuplet-number::non-default-fraction-with-notes
  NUM NUM-DURATION DENOM DENOM-DURATION)
```

Tuplet formatting functions. The last three draw `metronome` style notes for the specified durations.

`(ekm-tuplet-number NUM DENOM)`

Draw NUM:DENOM, or NUM only if DENOM is 0. Use the actual tuplet fraction for NUM or DENOM if `#f` is specified. It is called by the first four functions above, i.e. they are equivalent to:

```
(ekm-tuplet-number #f 0)
(ekm-tuplet-number #f #f)
(ekm-tuplet-number NUM 0)
(ekm-tuplet-number NUM DENOM)
```

```
\relative c'' {

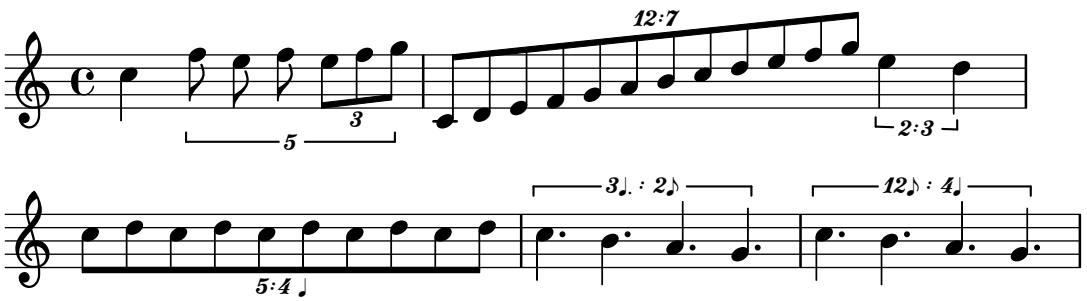
```



`\ekmSmuflOn #'fingering`

Draw SMuFL fingering instructions specified with a digit or with `\finger` , as well as right-hand fingerings specified with `\rightHandFinger` , using `\ekm-finger` .

`\ekm-finger DEFINITION`

Draw a fingering instruction as markup. DEFINITION may consist of the following keys. If the first character is `*` the italic version of 0 … 9 ( ) [ ] is drawn.

`0`	𝟎	U+ED10	fingering0
	:		
`5`	𝟓	U+ED15	fingering5
`6`	𝟔	U+ED24	fingering6
	:		
`9`	𝟗	U+ED27	fingering9

LE	⎤	U+E671	keyboardPlayWithLHEnd

`\ekmPlayWith HAND START MUSIC`

Draw a keyboardPlayWith… symbol (see `R RE L LE` above) alongside the notes in MUSIC. HAND is `RIGHT` or `LEFT`. START is `#t` for the start symbol placed to the left, or `#f` for the end symbol placed to the right.

Note:
The `\thumb` command always produces normal LilyPond output. Use `\finger "th"` to draw the corresponding SMuFL glyph.

```
\relative c'' {
  \ekmSmuflOn #'fingering

  c - 2
  c - \finger "4~~3"
  c - \finger "*(5)"
  c - \finger "[s]"
  b _ \finger "th"
  b _ \finger "ht"

  \ekmPlayWith #RIGHT ##t c
  \ekmPlayWith #RIGHT ##f g

  \ekmPlayWith #LEFT ##t c
  \ekmPlayWith #LEFT ##f g
}
```

String number indications

`\ekmSmuflOn #'stringnumber`

Draw SMuFL string number indications specified with \NUMBER, using `\ekm-string-number` .
Note: `\romanStringNumbers` overrides the SMuFL switch so that reverting with `\arabicStringNumbers` produces normal LilyPond output.

`\ekm-string-number ARG`

Draw a string number indication as markup. ARG is a number or string. For a number or a string representing a number, the respective SMuFL symbol is drawn if the number is in the range 0 to 13, else the number itself is drawn with a cicle around. Any other string, e.g. a Roman numeral, is drawn in italic style.

0	⓪	U+E833	guitarString0
	:		
9	⑨	U+E83C	guitarString9
10	⑩	U+E84A	guitarString10
	:		
13	⑬	U+E84D	guitarString13

```
\relative c'' {

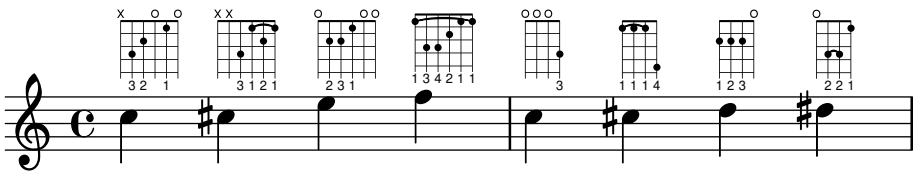
  c   ^ \markup \ekm-fret-diagram-terse #"o;o;o;3-3;"
  cis ^ \markup \ekm-fret-diagram-terse #"1-1-(;1-1;1-1-);4-4;"
  d   ^ \markup \ekm-fret-diagram-terse #"2-1;2-2;2-3;o;"
  dis ^ \markup \ekm-fret-diagram-terse #"o;3-2-(;3-2-);1-1;"
}
```



Accordion registers

`\ekm-accordion NAME`

Draw an accordion register symbol as markup, similar to the commands in `(scm accreg)`.
NAME can include a prefix for the register type, separated by a space:

`d`	Discant (default)
`sb sb4 sb5 sb6`	Standard bass, four/five/six reed
`fb`	Free bass
`sq`	Square

Most of the symbols use precomposed glyphs. The others are composed using accdnCombRH3RanksEmpty (U+E8C6) et al.

`\ekmAccordion NAME`

Set an accordion register symbol as a standalone music event.
This is equivalent to `<> ^ \markup \ekm-accordion NAME`

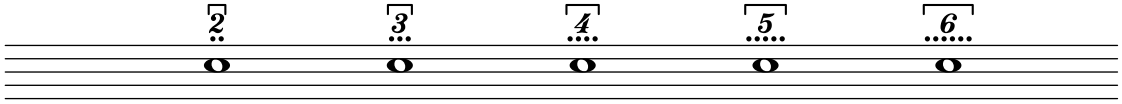
Accordion ricochet

`\ekmRicochet NUMBER`

Draw a ricochet symbol as an expressive mark (script). NUMBER is an integer in the range 2 to 6. [Ly]

#2	U+E8CD	accdnRicochet2
#3	U+E8CE	accdnRicochet3
#4	U+E8CF	accdnRicochet4
#5	U+E8D0	accdnRicochet5
#6	U+E8D1	accdnRicochet6



`\ekmStemRicochet NUMBER MUSIC`

Draw a ricochet symbol vertically centered on the stems in MUSIC. NUMBER is an integer in the range 2 to 6.

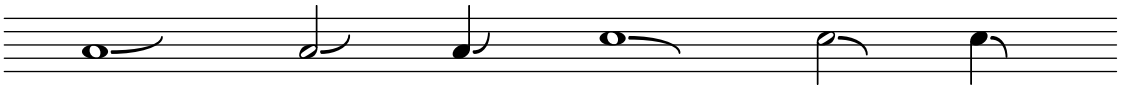
#2	U+E8D2	accdnRicochetStem2
#3	U+E8D3	accdnRicochetStem3
#4	U+E8D4	accdnRicochetStem4
#5	U+E8D5	accdnRicochetStem5
#6	U+E8D6	accdnRicochetStem6

Falls and doits

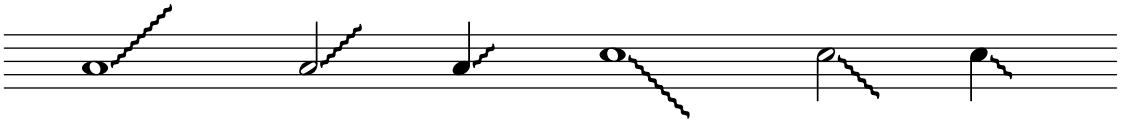
`\ekmBendAfter STYLE DIRECTION`

Draw a fall or doit (lift) symbol after a note. STYLE can be one of the following symbols.

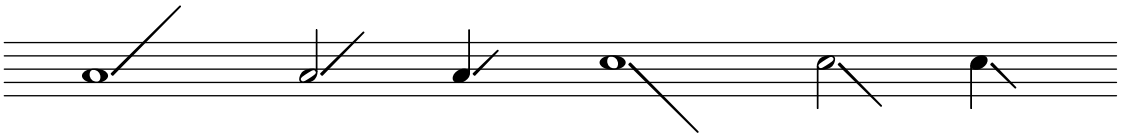
`#'bend #UP`	U+E5D6	brassDoitLong
	U+E5D5	brassDoitMedium
	U+E5D4	brassDoitShort
`#'bend #DOWN`	U+E5D9	brassFallLipLong
	U+E5D8	brassFallLipMedium
	U+E5D7	brassFallLipShort



`#'rough #UP`	U+E5D3	brassLiftLong
	U+E5D2	brassLiftMedium
	U+E5D1	brassLiftShort
`#'rough #DOWN`	U+E5DF	brassFallRoughLong
	U+E5DE	brassFallRoughMedium
	U+E5DD	brassFallRoughShort



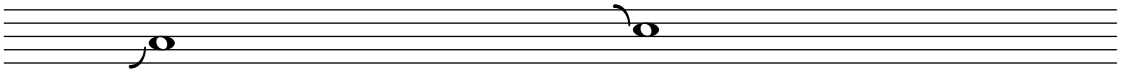
`#'smooth #UP`	U+E5EE	brassLiftSmoothLong
	U+E5ED	brassLiftSmoothMedium
	U+E5EC	brassLiftSmoothShort
`#'smooth #DOWN`	U+E5DC	brassFallSmoothLong
	U+E5DB	brassFallSmoothMedium
	U+E5DA	brassFallSmoothShort



`\ekmScoop DIRECTION MUSIC`

Draw a scoop or plop symbol to the left of each note in MUSIC.

`#UP`	U+E5D0	brassScoop
`#DOWN`	U+E5E0	brassPlop



Figured bass

`\ekmSmuflOn #'fbass`

Draw SMuFL bass figures with `\figuremode` . Some raised/diminished figures use precomposed glyphs which ignore the property `figuredBassPlusDirection` .

0	𝟎	U+EA50	figbass0
1	𝟏	U+EA51	figbass1

`\ekmSmuflOn #'lyric`

Draw the words in a lyric input mode (`\lyricmode` etc.) with `\ekm-tied-lyric` .
Note that the characters `_ %` must be quoted in order to be passed on to this command.

`\ekm-tied-lyric STRING`

Draw the string as markup, replacing the characters `~ _ %` with the glyphs specified below. The space between the adjoining words depends on the width of the respective glyph, while the property `word-space` is ignored. The narrow elision for single characters works with all Unicode characters, contrary to `\tied-lyric` .

~	‿	U+E551	lyricsElision

Analytics symbols

`\ekm-analytics DEFINITION`

Draw analytics symbols as markup. DEFINITION may consist of the following keys.

`H`		U+E860	analyticsHauptstimme
`CH`		U+E86A	analyticsChoralmelodie
`RH`		U+E86B	analyticsHauptrhythmus
`N`		U+E861	analyticsNebenstimme
`[`		U+E862	analyticsStartStimme
`]`		U+E863	analyticsEndStimme
`Th`		U+E864	analyticsTheme
`hT`		U+E865	analyticsThemeRetrograde
`ihT`		U+E866	analyticsThemeRetrogradeInversion
`iTh`		U+E867	analyticsThemeInversion
`T`		U+E868	analyticsTheme1
`iT`		U+E869	analyticsInversion1

Function theory symbols

`\ekm-func DEFINITION`

Draw a function theory symbol as markup. DEFINITION is a string of the form:

Paren Function , Bass , Soprano ^ Extra ... Paren

All parts are optional and may consist of the keys further below.
The bass/soprano symbol is placed below/above the function symbol.
The extra symbols are stacked vertically and raised to the right of the function symbol.
A leading/trailing parenthesis `( ) [ ] { }` is placed separately before/after the entire symbol.
Used properties:

- `font-size` (0) for the function symbol.
- `func-size` (-4) relative to the font size for bass, soprano, and extra symbols.
- `func-skip` (2.5) for vertical distances.
- `func-space` (0.3) for horizontal space around the function symbol.

`\ekmFunc DEFINITION`

Set a function theory symbol as a music expression, for use in a `Lyrics` context. The symbol is drawn with a 4 steps smaller font size compared to `\ekm-func` .
DEFINITION is a string as described above, with a further optional suffix:

`-` Starts an extender line after the symbol.
`.` Stops an extender line at the symbol.
`+` Inserts the symbol between notes with `\set stanza` .
`*` Dito but with the 4 steps larger font size of `\ekm-func` .

Note that the `Lyrics` context requires the `Text_spanner_engraver` to draw extender lines.

`\ekmFuncList DEFINITION-LIST`

Set a sequence of function theory symbols as music expressions, for use in a `Lyrics` context.
DEFINITION-LIST is a list of strings as for `\ekmFunc` .

`T`	T	U+EA8B	functionTUpper
`Tg`	Tg

~			

The keys `b # bb x =` draw standard accidentals for chord symbols.

The key `~` draws a space with the dimensions of functionZero (U+EA70) . This is especially useful for empty extra symbols.

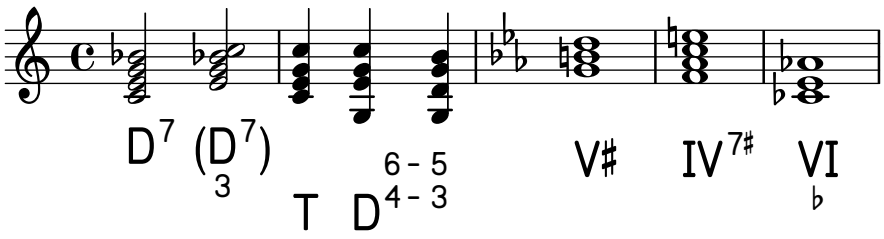
The following example uses `\ekm-func` in text scripts to attach function theory symbols to chords and spacer rest. It sets `\textLengthOn` and `TextScript.staff-padding` for a consistent vertical alignment.

```
\relative c' {
  \textLengthOn

  \override TextScript.staff-padding = #6
  <c e g bes>2_\markup \ekm-func "D^7 "
  <e g bes! c>_\markup \ekm-func "(D,3^7)"

  \override TextScript.staff-padding = #11
  <c e g c>4_\markup \ekm-func "T___"
  <g e' g c>_\markup \ekm-func "D^4^6"
  s_\markup \ekm-func "^-^-"
  <g d' g b>_\markup \ekm-func "^3^5"

  \key es \major
  \override TextScript.staff-padding = #7
  <g' b d>1_\markup \ekm-func "V#"
  <f as c e>_\markup \ekm-func "IV^7#"
  <ces es as!>_\markup \ekm-func "VI,b"
}
```



The following example uses `\ekmFuncList` in a Lyrics context to synchronise function theory symbols to music. The Lyrics context requires the `Text_spanner_engraver` and is aligned to a NullVoice context. It is taken from lsr.di.unimi.it/LSR/Item?id=967 and adapted for Esmuflily.

```
funcSoprano = \relative c'' {
  e4 e e( d)
  c4 d d2
  d4 e8 d c4 c
  d8( c) <b g>4 c2
}

funcAltTenor = \relative c'' {
  <c g>4 <bes g> <a f>2
  <a d,>4 <c a> <c a>( <b g>)
  <b e,>2 <g e>4 <a f>
  <a d,>4 d,8( f) <g e>2
}

funcBass = \relative c {
  \clef bass
  c4 cis d2
  f4 fis g2
  gis2 bes4 a8 g
  fis4 g c,2
}

funcAligner = \relative c {
  c4 cis d d
  f4 fis g g
  gis4 gis8 gis bes4 a8 g
  fis8 fis g g c,2
}

funcSymbols = \lyricmode {
  \set stanza = #"C major:"
  \ekmFuncList #'(
    "T,,3"  " (*"  "/D,3^7^9>"  ")*"  "Sp^9-"  "^8."
    "S^5^6"  "(D,3^7)"  "D^2^4-"  "^1^3."
    "(D,3^7-"  "^8"  "^7."  "_) [Tp] +"  "(D,7)"  "S,3-"  " ,2."
    "DD,3^8-"  "^7."  "D^5-"  "^7."  "T"
  )
}

\layout {
  \context {

Arrows and arrow heads

`\ekm-arrow STYLE ORIENTATION`

Draw an arrow, an arrow head, or a geometric shape according to ORIENTATION as markup.
STYLE can be one of the following symbols. For most of the styles, diagonal and/or “bilateral” orientations are not supported, e.g. there are no both-sided arrow heads.

`black`	↑	U+EB60	arrowBlackUp
`white`	⇧	U+EB68	arrowWhiteUp
`open`	↑	U+EB70	arrowOpenUp

open-head	∧	◹	>	◿	∨	◺	<	◸				
black-triangle	▲	◥	▶	◢	▼	◣	◀	◤				

`\ekm-arrow-head AXIS DIRECTION FILLED`

Draw an arrow head as markup, i.e. `black-head` if FILLED is a true value, else `open-head` .

Percussion symbols

`\ekm-beater STYLE ORIENTATION`

Draw a percussion beater according to ORIENTATION as markup.

STYLE can be one of the following symbols. The suffix separated by `-` is optional. If it is not specified or unknown the first matching style in the list is drawn. Styles in the list without `-`... actually have the suffix `-normal` which need not be specified.

Most of the beaters have predefined glyphs for the orientations `N S NE NW`, the others only for `N S` or `N`. The remaining orientations are achieved by flipping or by rotating through 90 or 30 degrees.

Some symbols in all orientations:

ORIENTATION	#N	#NE	#E	#SE	#S	#SW	#W	#NW
xyl-medium								
bass-metal								
hand-finger								

Electronic music symbols

`\ekm-fader LEVEL ORIENTATION`
`\ekm-midi LEVEL ORIENTATION`

Draw a fader (volume control) and a MIDI controller, respectively, as markup. For the thumb position, the level is rounded to the nearest integral percent value, limited to 100. If this is a multiple of 20, the respective precomposed glyph is used. Else the empty control and the thumb glyphs are combined. Note that they are Ekmelos specific for the MIDI controller.

- LEVEL ≥ 0 is a percent value.
- LEVEL < 0 is a decibel (dB) value, e.g. -6.0 is equivalent to 50.

It is drawn as a label next to the control according to ORIENTATION or `#f` for no label.

Used properties:

- `label-format` (#f): `#f` uses `"~a%"` for percent and `"~adB"` for decibel values.
- `font-size` (0)
- `label-size` (-4) relative to the font size.
- `padding` (0.3)

`0`		U+EB2E	elecVolumeLevel0

`\ekm-fader`								
								
`\ekm-midi`								
								

Other symbols

`\ekm-fermata STYLE`

Draw a fermata as markup. STYLE can be one of the following symbols.

Used property:

- `direction`

`default`		U+E4C0	fermataAbove
		U+E4C1	fermataBelow
`short`		U+E4C4	fermataShortAbove
		U+E4C5	fermataShortBelow
`long`		U+E4C6	fermataLongAbove
		U+E4C7	fermataLongBelow
`veryshort`		U+E4C2	fermataVeryShortAbove
		U+E4C3	fermataVeryShortBelow
`verylong`		U+E4C8	fermataVeryLongAbove
		U+E4C9	fermataVeryLongBelow
`extrashort`		U+F69E	fermataExtraShortAbove
		U+F69F	fermataExtraShortBelow
`extralong`		U+F6A0	fermataExtraLongAbove
		U+F6A1	fermataExtraLongBelow
`henzeshort`		U+E4CC	fermataShortHenzeAbove
		U+E4CD	fermataShortHenzeBelow
`henzelong`		U+E4CA	fermataLongHenzeAbove
		U+E4CB	fermataLongHenzeBelow

`\ekm-eyeglasses DIRECTION`

Draw eyeglasses as markup.

`LEFT`		U+EC62	miscEyeglasses
`RIGHT`		U+F65F	miscEyeglassesRight

`\ekm-metronome COUNT`

Draw COUNT metronome strokes as markup, i.e. the glyph noteTick (U+F614) which is Ekmelos specific. COUNT is a positive integer.
Used property:

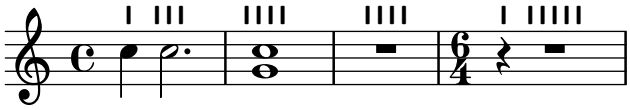
- `word-space`

`\ekmMetronome MUSIC`

Attach metronome strokes to each note, chord, or rest in MUSIC as a horizontally centered markup above the staff, using `\ekm-metronome` . The number of strokes equals the number of quarter note values of the respective duration (possibly rounded up).

```
\relative c'' {
  \ekmMetronome {
    c4
    c2.
    <g c>1
    R1
  }

  \time 6/4
  \ekmMetronome r4
  \ekmMetronome r1*5/4
}
```



They implement the underlying SMuFL output in Esmuflily.

`\ekm-char CODEPOINT`

Draw the glyph of CODEPOINT, or the point-stencil for zero.
Used property:

- `font-size` (0)

```
\ekm-char ##xE048
```

```
\ekm-char ##xEB27
```

`\ekm-chars CODEPOINT-LIST`

Draw the glyphs of the CODEPOINTs in the list adjoined horizontally without padding, or the point-stencil for an empty list.
Used property:

- `font-size` (0)

```
\ekm-chars #'(#xE260 #xE2B4 #xE2B2)
```

```
\ekm-chars #'(#xE262 #xE566 #xEAA6 #xEAA5)
```

```
\ekm-chars #'(#xE1F0 #xE1F7 #xE1FC #xE1F7 #xE1F4)
```

`\ekm-charf CODEPOINT FEATURES`

Draw the glyph of CODEPOINT with font features.
FEATURES is either a list of one or more strings, or the number of a stylistic alternate, or a negative number to draw the path instead of the font glyph.
`#1` and `#'(1)` and `#'("salt 1")` are equivalent. `#0` and `#'()` do not set font features.
`#-1` and `#'(-1)` draw a filled path. Any other negative number `-N` draws the outline of the path with thickness `N` which is scaled to the current font size.
This command is independent of globally drawing paths .
Used property:

- `font-size` (0)

```
\ekm-charf ##xE242 #0
```

```
\ekm-charf ##xE242 #'("salt 1")
```

```
\ekm-charf ##xE242 #'(2)
```

```
\ekm-charf ##xE242 #-20
```

`\ekm-str STRING`

Draw STRING with the selected font, independent of globally drawing paths .

`\ekm-text EXTEXT`

Draw EXTEXT . Depending on the argument type, it calls `\ekm-char`, `\ekm-charf`, or `\ekm-chars`, or it draws markup.

```
\ekm-text #'(#xE242 0)
\ekm-text #'(#xE242 "salt 1")
\ekm-text #'(#xE242 -20)
\ekm-text #'(#xE260 #xE2B4 #xE2B2)
```

`\ekm-line EXTEXT-LIST`

Draw the EXTEXTs in the list in a horizontal line.
Used properties:

- `word-space`
- `text-direction`

```
\ekm-line #'(#xE046 "al fine")
\ekm-line #'(#xE6D0 "with" #xE78E)
\ekm-line #'((#xE6D0 1) "with" #xE78E)
```

`\ekm-def MAP DEFINITION`

Draw a text according to DEFINITION .
MAP is an alist of EXTEXTs mapped onto key strings. A key which is a prefix of other keys must be arranged after them in MAP, i.e. the correct order is `"abc"` , `"ab"` , `"a"` . A common key (`" "` , `"_"` , etc.) can be overridden. The special value `#f` draws nothing, i.e. the key is simply ignored.

```
#(define my-map `(
  (".|:" . #xE040)
  ("tr#~" . (#xE262 #xE566 #xEAA6 #xEAA5))
  ("timp" . (#xE6D0 1))
  (" " . #f)
  ("w" . "with")
  ("box/" . ,(markup #:box #:ekm-beater 'timpani-medium NE))
))

\ekm-def #my-map #".|:___tr#~"
\ekm-def #my-map #"timp w box/"
```

`\ekm-label ORIENTATION LABEL ARG`

Combine a markup with another markup placed as a label next to it according to ORIENTATION (= `#f` ignores the label).
Used properties:

- `font-size` (0)
- `label-size` (-4) relative to the font size.
- `padding` (0.3)

```
\ekm-label #SE \ekm-char ##xE836 "G"

\ekm-label #NW "Medium" \ekm-char ##xE78E
```

`\ekm-number CODEPOINT NUMBER`

Draw the integer NUMBER as a decimal digit string.
CODEPOINT is either the code point of digit 0, or a vector with the code points of digit 0 - 9.

```
\ekm-number ##xE880 #1234

\ekm-number ##xEA70 #2345

#(define my-dig '#(
  #xEA50 #xEA51 #xEA52 #xEA54 #xEA55
  #xEA57 #xEA5B #xEA5D #xEA60 #xEA61))
\ekm-number #my-dig #3456
```

`\ekm-cchar CENTER CODEPOINT`

Draw the glyph of CODEPOINT, centered horizontally if CENTER is 1 or 3 (bit 0), and vertically if CENTER is 2 or 3 (bit 1).

`\ekm-ctext CENTER EXTEXT`

Draw EXTEXT . Markup is centered like `\ekm-cchar` . A list of code points is centered only horizontally. A single code point (possibly with font features) is never centered. This command is intended to draw symbols on stem.

`\ekm-combine CODEPOINT X Y CODEPOINT2`

Combine the glyphs of CODEPOINT and CODEPOINT2, where CODEPOINT2 is translated scaled by X,Y.

```
\ekm-combine ##xECA5 #-0.5 #1.0 ##xE56E

\ekm-combine ##xEA7F #0.3 #0 ##xE87B
```

Extended text

Some commands accept an EXTEXT value, or a pair or list of EXTEXT values.
EXTEXT can be:

- a single code point (integer). Calls `\ekm-char`.

  ```
  ##xE695
  ```

- a list of a single code point followed by font features, i.e. one or more strings or a number 0 to 31 of a stylistic alternate, or a negative number to draw the path instead of the font glyph. Higher values are treated as code points (see below). Calls `\ekm-charf`.

  ```
  #'(#xE626 "salt 2")
  ```

  ```
  #'(#xE626 2)
  ```

  ```
  #'(#xE626 -1)
  ```

- a list of one or more code points. Calls `\ekm-chars` .

  ```
  #'(#xE260 #xE567 #xE262)
  ```

- any markup.

  ```
  #"poco a poco"
  ```

  ```
  #(markup #:box #:ekm-char #xED19)
  ```

Note: The commands `\ekmTremolo` and `\ekmStem` interpret some strings to draw predefined symbols.

Definition string

Some commands and properties accept a DEFINITION value. This is a string of one or more keys, each consisting of one or more characters. Their corresponding values (mostly single glyphs) are stacked in a line. Any other character in the string produces a warning and only the text created so far is drawn.

Common keys

These keys are always applicable but can be overridden in the MAP specified with `\ekm-def` .

`<space>`	U+0020	space
_	U+200A	hairspace
__	U+2009	thinspace
____	U+2002	enspace
_____	U+2003	emspace

Orientation

Some commands accept an ORIENTATION value. This is the sum of axis (0, 1, or ±0.5 for diagonal) and direction (±1). The following symbols are defined for the 12 possible values. The last four values are intended for “bilateral” orientations. Currently, only `\ekm-arrow` supports them for a few styles.
An unsupported value is substituted with `N` .

`N`	2	Y	+ UP
`NE`	1.5	0.5	+ UP
`E`	1	X	+ RIGHT
`SE`	0.5	-0.5	+ RIGHT
`S`	0	Y	+ DOWN
`SW`	-0.5	0.5	+ DOWN
`W`	-1	X	+ LEFT
`NW`	-1.5	-0.5	+ LEFT
`NS`	-2	Y	+ -3
`NESW`	-2.5	0.5	+ -3
`EW`	-3	X	+ -3
`SENW`	-3.5	-0.5	+ -3
